Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 October 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

This Office action is in response to the amendment filed October 1, 2003.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-5, 7,8, 13-18, 20-23, 34, and 36-39 are rejected under 35 U.S.C. 102(e) as being anticipated by KURISAKI et al.

The claimed invention is drawn to a positive working imageable composition comprising an ink-receptive hydroxyfunctional resin comprising a covalently bound radiation sensitive

Art Unit: 1752

group capable of increasing the solubility of said imageable composition in an alkaline developer upon exposure to radiation; and an isocyanate crosslinking agent.

KURISAKI et al anticipates the claimed invention at Example 1 by disclosing a photosensitive quinonediazide compound made by a condensation reaction with a oligomeric novolak resin, a crosslinking isocyanate compound and an additional acrylic resin, see column 8, line 58 – column 9, line 32. The formula found on in column 2, line 58 – 68 discloses a polyphenolic compound esterified with a 1,2-naphthoquinonediazide compound. This compound/oligomer is made by a condensation reaction between a phenolic compound and an aldehyde like novolaks and is seen to meet the hydroxyfunctional resin as claimed in the application.

The arguments and amendment has been carefully considered, however the novolak resins are seen and known to be ink receptive, thus still meeting the newly amended scope, see column 29, lines 10-15 in cited reference NISHINO et al. The rejection is repeated and no claim is allowed.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1752

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
